Education

National University of Singapore

Aug 2022 – July 2026

- Bachelor of Computing in Computer Science (Honours)
- NUS College (Formally known as University Scholarship Programme)

Work Experience

Ant Group, Java Backend Engineer Intern

Sept 2025 - Dec 2025

- Developed and maintained Antom's subscription payment product using Java Spring Boot and microservice architecture with schedulers, message queues, and other middleware, following AI-native SDLC practices

Clifford Capital, Software Engineer Intern

May 2025 - Aug 2025

- Developed and deployed a full-stack Supabase-ERN web app on Azure's app service, streamlining the Front Office's process of providing credit rating and loan origination workflows across the company.

Global OneClick, Full Stack Intern

July 2024 - Jan 2025

- Involved in a full-stack development to automate the workflow of predicting targeted consumers with in-house algorithms using Vue.js, TypeScript, Element Plus for frontend, Java Spring Boot, MyBatis-Plus for backend
- Analysed Google Analytics 4 data using BigQuery and Python to extract insights of average consumer conversion cycles and customer behaviour patterns
- Developed a rule-based algorithm to identify users who have a higher chance of conversion for more effective ads placement

Explico, AI Engineer Intern

May 2024 – June 2024

- Developed and deployed an ML solution using Docker, Microsoft IIS and GCP (Cloud SQL, App Engine), including RESTful API development using Python Flask, resulting in personalised question recommendations tailored to students' weaknesses, impacting a user base of 10,000+
- Created an in-house algorithmic Generative AI-powered grading solution with Google Vertex AI

IMDA, Software Engineer Intern

May 2023 – July 2023

- Developed a GPT-powered SlackBot using Langchain and ChromaDB to automate query responses, doubling HR productivity by eliminating manual document scanning

Personal Achievements

- IMDA Singapore Digital (SG Digital) Scholarship (Undergraduate) 2022 Recipient
- Won the IMDA Awards 2024 (Team) in streamlining corporate information with GenAISlack Bot

Personal Experience

FaithCompanion - Android Mobile Application Development Project

- Developed a Church-based interactive application using Flutter and Firebase to provide church goers with a 1-stop platform to actively take part in church activities

Master Microservices with Spring Boot and Spring Cloud Udemy Certification

CFA Institute Investment Foundations Certificate

Skills

Programming Language: Java (Spring Boot), JavaScript (React.js & Vue.js), HTML5, SQL, CSS, Git, Python3, Dart

Methodologies & Practices: AGILE, System Integration Testing (SIT), User Acceptance Testing (UAT)

Software & Databases: postgresql, mysql, Firebase, sql server, postman
